PROFILE

I'm a passionate aspiring software developer with a strong interest in JavaScript, Python and Web development. I enjoy building projects, solving coding problems, and continuously learning new technologies to improve my skills. Currently, I'm focused on strengthening my programming fundamentals and growing as a developer through hands-on practice and real-world projects.

EDUCATION

B.Tech in Computer Science Engineering 2021 – 2025
Vaageswari College of Engineering Karimnagar, India

Intermediate Education (MPC) 2018 – 2020
SR Junior College Warangal, India

SKILLS

Programming Languages — Python, Java, HTML, CSS, Javascript.

Frameworks — ReactJs, Bootstrap, TailwindCSS.

Databases — MySQL

Tools — Visual Studio Code, Pycharm

PROJECTS

My BookList 🔗

Tech Stack: HTML, TailwindCSS, Javascript.

- Developed a responsive CRUD-based book management application with features to add, display, search, update, and delete books. Implemented data persistence using Local Storage and built dynamic user interactions through JavaScript DOM manipulation and event handling.

Monitoring Staff Presence Through QR-Code Scanning

Tech Stack: Java, HTML, CSS, MySQL.

- Developed a QR-based attendance system that allows users to mark attendance by scanning a unique QR code. Built a secure and efficient backend to store and verify attendance records in real time.

Predicting Voting Outcomes For Multi-Alternative Elections In Social Networks

Tech Stack: Java, HTML, CSS, MySQL

- Developed a predictive model for complex elections using a new 'Minimal Influence Gap' metric, successfully validating voting outcomes across diverse social network structures.

CO-CURRICULUM ACTIVITIES

Activities

- Participated in technical seminars related to emerging technologies and industry trends.
- Volunteered in Smart India Hackathon, contributing to event coordination and supporting participants throughout the competition.
