PROFILE

Aspiring Software Developer with hands-on experience building **frontend** and **full-stack applications**, from designing user interfaces to implementing **APIs**, **databases**, **authentication**, and **real-world application features**. Strong problem-solving mindset with a focus on learning through building, writing practical solutions, and continuously improving development skills.

EDUCATION

Vaageswari College of Engineering June 2025
Computer Science and Engineering

SR Junior College March 2020
Intermediate Education

PROJECTS

Property pulse | [Live](#) | [Github](#) Aug. 2026

Tech stack : *Next.js, React.js, MongoDB, RESTful API's, NextAuth.js, Cloudinary, MapLibre GL*

- Developed a full-stack property rental platform that enables users to **discover, search, filter, and explore properties** through an intuitive and responsive interface.
- Implemented **secure user authentication and login**, along with property management, image handling, and bookmarking features to support a complete rental workflow.
- Integrated **location-based property discovery with interactive maps**, converting property addresses into geographic coordinates through geocoding for visual property exploration.

Movie explorer | [Github](#) June 2026

Tech stack: *React.js, Appwrite, JSON Server, Vite, React-use*

- Built a responsive movie discovery app with **search, browsing, and dynamic trending** features.
- Integrated **JSON Server APIs** for movie data retrieval and implemented an **Appwrite-based trending system** that ranks movies by search frequency.
- Developed **reusable React components** with React-use and Tailwind CSS for a responsive and maintainable UI.

My Booklist | [Live](#) | [Github](#) May 2026

Tech stack : *HTML , JavaScript, Tailwind CSS, Local Storage*

- Built a dynamic book management app with **add, edit, delete, search, and form validation** functionality.
- Implemented **Local Storage persistence** to save, update, and retrieve book data across sessions.
- Developed interactive CRUD operations using **vanilla JavaScript and DOM manipulation** without external frameworks.

SKILLS

Languages: JavaScript, Python, HTML , CSS

Frontend: React, Next.js, Tailwind CSS, Bootstrap

Backend: REST API's, Next.js API Routes

Database: MongoDB, Mongoose

Tools : Git/GitHub, Docker, VS Code
